## Experience

### ReversingLabs

*Senior Technical Writer*

**Zagreb, Croatia**

*February 2024 – Present*

- Led the initiative to build a public documentation portal. Created the architecture and managed the infrastructure automation. The result was a successful transition from docs behind a login to public-facing documentation, reducing support ticket load.

*Technical Writer*

*October 2020 – February 2024*

- Advocated for and successfully implemented CI/CD for docs. Created pipelines for building, testing, and publishing documentation, which reduced dependency on local scripts and ensured repeatable builds.
- Completed an information architecture reorganization, which reduced duplicate info and significantly increased clarity and visibility.
- Wrote the entire OpenAPI specification for the company's cloud APIs, created the publishing tooling and implemented automated tests for code samples, ensuring ease of use for developers.

### Algebra

*Technical editor (contract)*

**Zagreb, Croatia**

*October 2022 – July 2023*

- Served as the editor for highschool textbooks in the field of programmable logic controllers and videogame graphics.

### Alkemist

*Technical translator (contract)*

**Zagreb, Croatia**

*September 2016 – October 2020*

- Translated technical manuals and regulations in the field of electricity distribution and cybersecurity.
